

“Open Science” course - Digital Humanities
and Digital Knowledge (DHDK)

Workshop

Unlocking the Potential of Open Educational Resources (OER) with Sylla and AI

11 April 2024

h. 15-17:30 CEST

Aula Affreschi, Via Zamboni 34

In this interactive workshop, students and instructors will explore the transformative potential of **OER** and gain insights into **Sylla**, **a new platform designed to enable the adoption of OER in the classroom and drive affordable learning.**

Facilitated by Max Mosterd, co-founder of Sylla, participants will first be introduced to understand the current state of OER (specifically Open Textbooks) and the challenges hindering their broader adoption. In addition, the supporting role of AI will be highlighted to grow student engagement and success. Through discussions and a live demo of Sylla, attendees will have the opportunity to share their perspectives, experiences, and feedback on using open materials.

By attending this workshop, participants will gain a comprehensive understanding of Open Textbooks, their impact on education, and how Sylla is building a solution to empower instructors and students.
