# Upgrading History

What does it mean “upgrading history”?

In order to tell the past once again, but from a different point of view, we need to use new technologies.

WWI was a huge event, which affected both the destinies of national governments and the life of common people.

Upgrading History, based on two separate platforms (StoryMaps and EVT) allows an unconventional reading of eight war diaries written by private soldiers, in Italian and French, and some letters reporting the first drafts of the poems of Isaac Rosenberg.

**The presentation of the project will be held in Bologna on 18 June 2019, 4.30 p.m., in via Zamboni 32 (Aula Forti), Department of Classical Philology and Italian Studies.**
